Annual report - 2010

MESSAGE FROM THE EXECUTIVE DIRECTOR

I welcome all of you once again to our social development initiatives and thanks to all the esteem readers, donor agency, academic fraternity—both students and professor, government organization, non-government organization, political leaders and the society at large. As we know the world continues to face various critical challenges as human-induced climate change, the rapid depletion of natural resources, the frequency of natural disaster, the spread of infectious diseases, the loss of biodiversity, the violation of human rights, increased poverty, the dependency of our economic system on continuous growth in consumerism and sustainable development has become a vehicle around the globe for expressing the need to depart from present dominant models of development which appear unable to balance the needs of people and the planet in the pursuit of peace and prosperity. In spite of that overpopulation is another important social issue we face today. It is one of the greatest concerns of mankind. The world is becoming ever more globalizes and knowledge-based, while society is becoming more complex and heterogeneous, consisting of individuals characterized by attractive sets of multiple identities. We think that only the fundamental purpose of education is to create good human beings. Education is vital to the healthy growth and development of ones personality. Because of we are more highlighting on education sectors both the early child education for children and vocational training education for unemployed youth in the country. Youth is that phase of life where dreams are built, hope is kindled and a bright future to foreseen. It is a beautiful time of life where a child turns into an energetic, confident individual. So, education serves as the means to bring about the desire change in society to develop a generation of honest individuals and thus contribute to the development of good human beings.

We hope that this publication will useful for all the esteem readers, development workers, decision makers, planners and policy makers and philanthropists all over the country. Wishing you all the very best for the New Year and happy reading.

James Mridul Halder
Executive director.

Aloshikha Rajihar Social Development Center

Annual Report - 2010

Introduction:

We never thinking this planet can be fragments by the narrow feelings of communalism or political conflicts. We live in one of the poorest country in south Asia where a limited scope of access our basic needs. We have to face various critical problems due to geographical point of view and over populated situation in the country where poverty is perpetual. In the context of the Aloshikha RSD Center has taken meticulous development initiatives to address the plight and problems of vulnerable poor community in the southern part of Bangladesh and covering the three districts. The Aloshikha RSD Center Bangladesh is a well reputed social development NGO working to empower the rural poor in the southern part of Bangladesh since 25 years. The Aloshikha come into being after liberation war of Bangladesh. In 1984 a social development program was launched to assist the poorest in community development mainly to improving health and sanitation, child education and women economic activities. During the year the Aloshikha was the leading non-government agency in the southern part of Bangladesh. It is also created with introducing many major innovations like deep tube well installation and latrine production and distribution was remarkable services among the poor community and promoting child education are most famous innovation. By the late 1995 an integrated comprehensive program superseded its sect oral work, focused on concentrated group organization of the poor, emphasizing social, education and economic elements. Since the Aloshikha successes have included the community based health and sanitation program to improving life on the out reach and remote villages are raising awareness of women rights and women empowerment, promoting savings, credit and skill training to improve the livelihoods of the poor section of the community. The Aloshikha program continues to evolve and innovate; current realities mean the program now comprises a range of various projects and financing large and small, which all contribute to a common objective. However, we are always encouraging to the local communities to developing all form of education in general or vocational education that could be make them smart and expertise to engaged any job or self supportive or self-employments.

This report is a testimony to the fact that with a synergetic approach towards development with support from the donor community and the local people a lot can be done to improve livelihoods.

Aloshikha Mission statement:

Aloshikha is a Bangladeshi non-profitable humanitarian non-government organization supporting the holistic development of poor and landless people in the rural marshlands between Gopalganj, Madaripur and Barisal.

Aloshikha will support the development in the following ways:

- To create awareness on the importance of child and blow education among local people.
- To create awareness on health, sanitation, women development issues and community problems among local people and to encourage them to change the present situation.
- To organize targeted poor people in small groups and make them skilled through education, training's workshops and meetings etc.
- To encourage and motivate poor people to take steps to reduce their problems, improve their health conditions and their income.
- To encourage and support the poor people to start their own activities in order to create their own income, so that they will become self- sustained.
- To provide among children and their development through nutrition coverage, child health education, nutritious food, creativity materials etc.
- To provide the safe water supply for hygienic health through the DTWs and distribution sanitary latrine to the community people as sanitation coverage.
- To encourage and convinced to the community people to provide renewable energy as solar system technology for alternative electricity.
- To create employment opportunity and job replacement among the local unemployed youth both the girls and boys and to export skill work force to the international labor market a vocational training center has launched in the Aloshikha complex.

Special events for 2010.

New special bed for Maria Mother & Child care Clinic (4 beds)

New general bed for purchases 2010 (10 beds)

It goes back about 12 years the Aloshikha Social Development Center has operated one rural hospital as name Maria Mother & Child Health Care Clinic working in the locality with nice name and fame. The hospital is situated within the Aloshikha complex and geographically it is very important because of around the 10 kilometers there is neither government hospital nor even any private clinic, where rural people can be accessing and met-up their emergency medial services. However, we are really grateful to Mr. Har Beurskins the Chairman of Aloshikha Foundation the Netherlands as to his generous donation of 4 special bed and another 10 general beds to this clinic very recently. We hope that it could be able to create more convenience and to be ensuring medial services among the rural poor people.

International training program by participating 20 NGO Director to making technology Bio-sand filter 2010

It was in 20 August 2010 the Aloshikha RSD Center have an brilliant opportunity to organize one International training program on Bio-Sand Filter making technology in collaboration with CAWST Canada. The main theme of the training was focused on safe drinking water access and arsenic contaminated filthy water how to be turn into safe water through Bio- Sand Filter use and its dynamic making technology at a low cost. The training was conducted and facilitated by the one of renowned overseas trainer Milinda Forum who engaged herself as an expertise on bio-sand filter technologist. More over 20 Directors of various NGOs from different places were attended on the training, as participators and duration of training program were 20 August to 27 August 2010. A much valued International Certificates have been provided every participators after long run of 7 days training courses.

Special events for Mr. E. IJ. Spier, President, SK Foundation, opening ceremony session vocational training program (MVTC) 2010

The Mr. E. IJ. Spier, honorable president of SK Foundation the Netherlands, held the Vocational Training Center inaugural opening ceremony on 2 February 2010. It was a memorable event where participated many of brilliant intellectual sagacity from the government sectors and non-government sectors and society at large. However, the laid stone is still commemorating name of the president of the Foundation and it could be always inspire and provoke our students to make them skill and expertise on trade in the Center.

Boys Hostel and Girls Hostel Opening.

We are really grateful to Josephus F.J.M. Verwilghen the Chairman of SAKO Foundation the Netherlands for his dedication and dynamic services to the Center. The Boys hostel of the center was opened by the Josephus F.J.M. Verwilghen and Girls hostel also opened by the respective Mrs. Erleijne Verwilghen Robesin on 2nd February 2010 in the center. The boys hostel remain 25 residential accommodation and girls hostel have 25 residential accommodations capacity. The laid stone is still commemorating their valuable contribution

Technology and science has come to relive mankind from sufferings, ignorance and to control nature and where theories also play a vital role that was always inevitable for us. In the point of view a colorful splendor event was organized on account of inaugural opening of theoretical classroom building and opened by Joost Verwilghen advisor of Aloshikha RSD Center on 19 October 2010. All of students and Instructor, principal of the Center together with key staff of Aloshikha and local elites person were participated in the event

Special events theoretical building opening ceremony, Mr. Joost Verwilghen advisor of Aloshikha RSDC Bangladesh

Aloshikha Rajihar Social Development Center (ARSDC) under Agailjhara Upazila of Barisal has initiated a medical check-up program for children around 11 hundred pre-school student (playgroup) those are living under poverty level. All the pre-school in project areas has strongly monitored and supervised by the Aloshikha. It had a merely significance and meticulous program which is influenced us to combating and encountering the child mortality and child diseases in our locality. One Dutch child specialist team along with nine members has provided free medical services and medicines among the six hundred pre-school children around the twenty schools. It was leaded and guided by the MCC team leader Dr. Joep the Netherlands.

MCC team are enjoying exclusively among the pre-school children during medical check-up, period.

The Medical Checks for Children (MCC) the Netherlands is a world famous charity organization that devoted and committed to address the plight and problems of physical disorder of vulnerable children in poor country. It was our proud that we have an opportunity to checks our 1100 pre-school children by the MCC team like very year. The team provided free medicine together with necessary medical test as to they to need. The main objectives of the program are to reducing and combating child mortality and child morbidity rate in the area.

Special events for Aloshikha newly started the tortoise & deer conservation program 2010

The Aloshikha RSD Center is a nonprofit charity organization whose aim is to conserve the country's biological diversity. Over the years Bangladesh has lost both land and water ecosystems along with the different forms of they contain.

We are now at a point where many species of plants and animals are on the verge. It is the appropriate time for urgent need of saving the biodiversity. In this point of view the organization has started the Spotted Deer and indigenous tortoise conservation program that was a very small scale and research based pilot program. Actually Deer are a unique group of mammals recognized for their grace of beauty. They are mostly the inhabitants of forest and grassland. The rapid development of firearms, trapping and netting, Deer everywhere become more vulnerable. Bangladesh Sundarbans also is a nice habitat of the Spotted Deer and as well as Barking Deer. The main prey species of Bengal tiger in the Spotted Deer, and it has caused grave concern among the nature conservationists and wildlife conservationist.

To attend the end of year 2010, yearly workshop special chief guest Abul Hasanat Abdulla chief whiff of per-lament member , & Md. Younus Talukder per-lament member with Aloshikha all staff.

The Aloshikha organized and celebrated the well-decorated grandeur emotional yearly annual conference on 1st January 2011 at VTC hall room. Most importantly that Mr. Abul Hasanat Abdullah a former chief whiff of National Assembly Bangladesh and renowned political sagacity was the chief guest in the conference. In addition to Advocate Talukder Md, Younus honorable MP (Member of Parliament). was the special guest in the event, including government high officials, local government elected representatives, local civil society members, all staffs of Aloshikha and all levels common people were gathered and spontaneously participated and enjoyed this multicolored joyful events

A. Community based health & sanitation program

Soft ware program/sanitation rally:

Culture show (pop song) at Ramander AK

The cultural show is one of the important alternative media for raise awareness on health hygiene sanitation, safe water use, arsenic and HIV/ AIDS etc. Aloskhia organized a number of rally and seminar to observe various special days. Poster, festoon, banner, cartoon etc. containing important messages were printed and displayed in the working areas to draw attention of the community people on the central theme of the special day

8th March World Women days 2010

The organization almost always gives more emphasized to women empowerment and to ensured women rights and to raised mass awareness on combating women trafficking and women violence among the community people in the area. National and International day observation are crucial and integral of the organization. In the light of, we celebrated the World Women Days 8th March 2010 along with poster, banner, leaflet and a colorful rally was organized and moved away the rally in main road and important places of Agailjhara Upazila.

Village health club groups meeting/Training

VHC Leaser training

In our on-going project, a total of 180 VHCs have been formed newly in 1st year, whereby the total VHC have been reached to 360. The purposes of forming a VHC are to assist community to assess health, hygiene and sanitation status and safe water use in their respective villages; disseminate health related information; and help Community Health Facilitators (CHF) of Aloshikha in organizing courtyard meetings. With support from VHCs, Aloshikha has been organizing health education sessions in each working village.

Staff development Training

Aloshikha arranged training for its staffs on water, sanitation and hygiene practice in its office premises by an expert trainer. A total of 26 staffs participated in this training. The training was for 7 days. Pre-test and post-test sessions were arranged among the trainees. The average marks obtained in pre-test was 40% while it was 90% in post-test session. The result indicates that this training helps the trainees to gather and increase knowledge on water, sanitation and hygiene practice. This training will help the

A total of 20 batches of HIV& AIDS orientation organized from the project running the working period that including 1st year, a total of 10 batches of orientation completed so far from the project whereby a total of 400 people were informed the basic information on HIV AIDS. People from different groups including male and female, community leaders, school teachers, religious leaders, social workers, cultural workers, etc. were participated in the orientation on HIV &AIDS. It had one-day orientation course by the FC

HIV/AIDS Training

Adolescent workshop

To aware adolescent girls about reproductive health, reproductive health education sessions will be arranged among adolescent girls by forming adolescent groups in intervention areas. An adolescent group is consisted of 15 adolescent girls. Paramedics Volunteer recruited for satellite clinics conducts education sessions among adolescent groups. Community Health Facilitators also assist them to conduct these sessions. One Paramedics Volunteer conducts 2 sessions in every day and works on it for 5 days along with 1 day work in satellite clinic in every week. As a result one Paramedic conducts 40 sessions with 40 adolescent groups in every month.

A total of 220 adolescent groups are formed in working areas by 12 Paramedics Volunteers where a total of 3300 adolescent girls are enrolled in education sessions during the reporting period. There is a target to arrange 2640 education sessions with adolescent girls which are achieved properly during this reporting period

Exploring and achieving the sustainable development and need to be organizational development a capacity building and financial management training was organized in the last week of September 2010. The training were conducted and facilitated by the external resource person as Mr. Amar Baddya who have a bright educational background on development work experience in the renowned National and International renowned development agencies. All key staff of management level of the organization was participated in the training.

Capacity building Finance Training

Masson training

A list of existing and potential local level latrine producers was prepared. At the initial stage, 7 private latrine producers were trained on low cost latrine production. Each producer was provided 1,300/- taka for their smooth production. As a result a total of 9,100/- taka were provided to 7 latrine producers

Community leader training sanitation (CLTS)

Sanitation is one of the broader activities of this project. To ensure sanitation for all, Community Led Total Sanitation (CLTS) approach- which means make a movement involving all to ensure house (HH) hold level and environmental sanitation is followed. For this purpose, it is planned to create awareness and social actions, in one hand, to promote sanitary latrine use at HH level; on the other hand contributory community latrines will be constructed to protect environmental sanitation in the target areas. Following activities are

- Produce low cost latrine and demonstrate models
- Train local level latrine producer and provide credit support
- Build and strengthen the capacity of local level government and other committees related to water and sanitation
- Observe national and international events

Doctor. Checking to children for the satellite clinic

Satellite clinics organized in 12 different spots in the PRIMA building; and the clinics were held once in a week in the PRIMA buildings on a rotating basis. The clinic remained open for 4 hours in each working day.

Satellite Clinic: The Satellite Clinic program is most important that is deeply involved with primary health care development among the vulnerable community people. The program is paying attention on to reducing child mortality and child morbidity rate in the area. In addition to take responsibility to checking pregnant mother health care and to ensure safe delivery of new borne babies and its care and nursing including all sorts of preventive measure as to need. The satellite clinics were held once in a week in the Prima building at last 12 different spots on a rotating basis through out the month accordingly.

A Case Study of Gain family hygienic food cooking

I am Shikha Gain and my age is only 35 years. My husband's name is Birendra Nath Gain and he is 45 years old. We are living at Rajiher village, Agailjhara Upazila under Barisal District Bangladesh. We have two daughters and two sons. My daughter has been married and sons are still studied education in school levels. However, I am surely one of household wife and happy with my limited worldly goods and surroundings. One day Mrs Irin Dena who is one of the development worker and health facilitator from Aloschikha RSD

Center came to my home and request me to join a Vorer Alo mother club that was newly formed in our area. Eventually I was joining in the mother club and come to know that one meeting will be held in a month as selected day. However one of the meetings the health facilitator was amply explains and depicted that the technology of hygienic kitchen room maintenance and its sanitation management system. I was amazed and surprised to know that extreme smoke is very harmful that comes out from the cooking period that was very common in rural kitchen by using wet firewood. Before joining the club I was not much enough awarded how to making hygienic kitchen room what way the smoke would be expelled what way I could be maintain sanitation and cleanliness in kitchen room. Before that I don't know about how to be prepared hygienic food and its preservation system etc. Now I better informed and much awarded on the issue. I went to the club regularly in selecting day. Just I am trying to ventilate this key message to our relatives and neighbors to follow on the issue in their daily life. In a word I was very grateful to health facilitator of Aloschikha RSD Center to her presented such meticulous initiatives that would be inspired me to change my daily life in better way.

100% Sanitation coverage hardware & software programs Bhagalbari & Bhuterbari

Deep tube well Installation system

For the project deep tube-wells (DTWs) have been installed in the different areas under three districts of Aloschikha. It cost Tk.38,000 to install each DTW of which community people share was Tk.6,000. A local contractor who nominated by Aloschikha and installation the DTWs with active participation of the community people.

B. Computer Training Program

Computer Training:

Mr. Har Beurskens Chairman of Aloshikha Foundation the Netherlands was denoted 13 reconditioned computers to the Aloshikha RSD center Bangladesh with a view to skill training in computer for unemployed youth (both the girls and boys) in target area and for job creation. In the light of the Aloshikha has been provided skill training in computer course on two Computer Operator Mr. Idrish khan and next Mr. Samson from Techno Touch System Ltd. Dhaka. Presently the Aloshikha has been completed 10 batches including 32 participants with skill in computer training -2010.

Computer training certificate distribution to 15th Batch

Credit Union Program

Doctor. Checking to children for the satellite clinic

The Aloshikha RSD Centre Bangladesh has started its journey on Development Training Credit Union Program Practically in 2007 under three districts which is located in south west part of Bangladesh. As a member-owned, not for profit financial cooperative, Development Training Credit Union Program is committed to our members. We will uphold our fundamental responsibility to actively serve our people within our field of membership, and as appropriate, the communities they live in. We will treat all members with respect and dignity. The Aloshikha has been organized seven credit union program in their respective areas. The chief accountant of Aloshikha was conducted monthly meetings. One credit union consists of 500 members as an average size. It was duly supported by the Aloshikha Foundation the Netherlands as a pilot and demonstrative program.

C. Integrated Rural Health Support Programme

Health Motivator carefully measuring weight of pregnant mother

The Aloshikha RSD Center always gives more emphasis towards the child health care and nutrition's deficiency. In order to the Organization had an opportunity to receive continue support from SAKO Foundation that has obviously strengthening the capacity of outreach works among our Health Motivators. In the light of their visits to take the feedback of the community based health activities through field visits with health motivators and organizing the nutrition camp in the village.

Last years Aloshikha was organized 12 nutrition camps at different villages among malnourished babies where 360 malnourished mothers were presence during nutrition camps. We motivated to the mothers about malnourished cause and consequences.

D. Education program:

Maria Child Care Biddanikaton (Rajihar).

In 2010 Maria child Care Biddanikaton had an opportunity to receive 108 numbers of students and still trying to provide them as quality education and included creativity activities on regular basis. A parents meeting was held on school premises yearly 3 times with a view to quality education. In Bangladesh all the Kindergarten schools are mainly academic oriented and we put little emphasis on extra curricular activities towards the students.

Satla is a too remote village, which is located under Wazirpur Upazila in the district of Barisal. The area is identified as a densely populated and flood porn area and found literacy rate is very below and major portion people are living there under poverty level.

The child education facilities being always over neglected there due to lack of local initiatives and lack of standard child education Institutions. In the light of the organization has build up one Kindergarten school in the area in collaboration with local elites persons actually who were interested in education and it established in 2008. However. Eventually the school is gradually developed and presently running with 167 students both the girls and boys usually they taught by the 7 efficient teachers accordingly.

Satla Kindergarten school (Nayakandi)

Yearly sports events in Goila Kindergarten school

The Goila kindergarten School is newly established in 2010 and running with 153 students both the girls and boys along with 7 experienced teacher. We hope that the overall teaching technique and educational environment may develop in a year.

E. Pre-school program.

Aloshikha is continuing 40 pre-schools since long and number of the students 1200. In our 40 pre-schools about 1200 students are getting quality of education by our competent teachers as well as free medical check-up, quality sanitation and hygiene facilities and nutritious feeding facilities. Our pre-school program is being continued supported by SK Foundation (the Netherlands). Aloshikha also offers a feeding programme for children where they are feeding milk and eggs four times in a week for ensure the nutrition deficiency.

Physical exercise for pre-school children

Feeding program for pre-school students

Aloshikha at a glance of pre-schools information 2005-2006-2007-2008-2009-2010:

Pre-school teachers	40	40	40	40	40	40

F. Micro-credit program

The Micro-credit program is growing annually. Aloshikha working area are the remote villages in Agailjhara, Wazirpur, Kalkini, Kotalipara, Rajoyer and sadar Gopalganj. In this low land area Aloshikha is reaching the poor communities and families. However Aloshikha could not fulfill all the demands of the beneficiaries.

The training program for beneficiaries and supervising, office staff and management will be continued in 2010.

The integrated approach of Aloshikha makes it possible to give a broad support to micro-credit beneficiaries. Not only practical training on small business activities, technical training and support are given by Aloshikha, but also preventive, primary and curative healthcare are offered by Aloshikha. Many children of micro-credit group members are attending Aloshikha pre-schools.

Income generating Program

Micro-credit program:

G. PRIMA program.

A large numbers of people were presence during opening hour of PRIMA, where people were very much eager and welcomed to Aloshikha for their positive rolls. These PRIMA buildings will be used for multipurpose works after hand over to the community people and before Aloshikha will execute school cum satellite clinical program 2010 total 37 PRIMAs were established in our activities areas.

J. Special training for TBAs and Village doctors

In 2006 Aloshikha Foundation donated a grant for TBAs and village doctors training, which is being implemented by Aloshikha. It's a meticulous program because after receiving the training, trainees are trained to handle the patients with good care and easily they could find the risk factors. As consequences people are getting good health care and on the other hand pregnant women can be get medical assistance during deliveries period.

20 Participants ware attended TBA training program supported by MAX Foundation.

The Traditional Birth Attended (TBA) training is playing a crucial role to ensure safe home delivery at rural village. We felt that most of the pregnant mothers in rural villages are not more experienced or much aware about safe home delivery system. In most cases they are depended on untrained or unskilled birth attended as a result child mortality rate is increasing significantly in the area. In order to the organization has lunched a TBA training to ensuring the safe home delivery of new borne babies and to reducing child mortality rate in the area. One TBA Kit Box has been provided every TBA Mother who is successfully passed the training course. The program were supported and financed by the Max Foundation the Netherlands.

Since 16 years ago Aloshikha was demonstrated to the community people for poultry farm business and it was very neglected business to the community people at that time with manifold problems such as bad smile from poultry faces, soft meat and only water inside an egg. So, Aloshikha has been achieved stupendous success through motivation and represented to the community people as model that it is a one kind of profitable business. Today there are many small poultry farms are being established surroundings areas behold with attention as model of Aloshikha poultry farm. It is really indeed, that community people have recognized as a pioneer of Aloshikha on poultry business. In 2010 the profits of the poultry farm were increasing, although the marketing situation for broiler were very difficult, because of low meat-prices.

Poultry

Poultry Farm

The dairy farm is a long-term investment and will be profitable from 2010. The number of cattle increased, several calves were born in 2010. This Aloshikha dairy farms also a model for the communities people because we are always with the community people for any kinds of facilities to establish small diary farms. Though it is a long-term investment but it is an old tradition for cow rearing among the community people.

I. Maria Mother & Child Health Care Clinic program of Aloshikha

This hospital grant was obtained from the Government of Japan in 1997 for building and purchase and no administrative costs were included in this grant. Still we are working our activities since 14 years and all medical accessories using properly. We are proud and thanked to them for this grant

We are proud and thanked to the Chairman (Mr. Har Beurskens) of Aloshikha Foundation in the Netherlands who has accomplished and disposed innumerable activities for the hospital of Aloshikha since long and still his vigilant eye for whole activities of Aloshikha with soft hearted.

A semi-pucca hospital named "Maria Mother & Child Health Care Clinic was constructed near the Aloshikha head office at Rajihar Union in 1997. In this hospital some advanced medical equipment was installed to serve the people in the working areas of Aloshikha. This working areas is situated in a low lying and ill-communicated areas where nearest health facilities as named government Thana Health Complex (THC) with limited medical services. Areas people are mostly depend on quack doctors, who are not as well trained as registered doctors and sever scarcity of the registered doctors.

The above circumstances were the main reasons for Aloshikha to start a small hospital with advanced medical equipments and especial attention is given to the health condition of women and children.

This hospital started its services in January 1997 and although it is expected that eventually the hospital will be self-sustaining in the long run but it is impossible to be self-sustaining right from the start. Aloshikha hopes to reach this start of self-sustainability in shortest possible times.

Maria Mother & Child Health Care Clinic services though the trained health providers are as follows:

- a) In door/Out door 24 hours along emergency management
- b) Major/minor operation facilities
- c) Ante-natal, neo-natal and post-natal along incubation facilities
- d) Diagnostics facilities such as Ultrasound, Diathermia, incubator, ECG, X-ray, Blood, urine, stool, sputum etc.
- e) Resistance fund facility for the poor
- f) Patients referral (Ambulance) and out call facilities
- g) Family planning, safe motherhood, breastfeeding, HIV and hygiene counseling
- h) Audio/ Video health conciseness program for out/in door patients
- i) Especial session on collaboration with the Bangladesh government such as EPT, NID, sterilization etc.

Being prepared for caesarian

In collaboration with Government and Aloschikha organized by permanent family planning system.

The Bangladesh is one of the largest densely populated countries as to its geographical area. In that sense over population is another social issue that we faced everyday. In the view of point the organization has started family planning program including reproductive health and sexual rights of young adults in their target respective area. The main objective of the project was to controlled population by providing family planning method and raising mass awareness on the issue among the community. The organization has affiliated from the Ministry of Health and Family Planning Bangladesh Government on August 3-2009. The program has possible to achieve a stupendous success on the field levels family planning activities in collaboration with Bangladesh government family planning departments. Over the year it had possible to provided permanent birth control system through tubectomy for 51 women and vasectomy for male 5 and IUD for women-8 and implant provided to the 16 women that was merely praiseworthy task for the organization

MVTC Program

Mechanical trade

Electrical trade is one of the most important rather than other trade. Electricity is an engine for all kind of development in the country and our social daily life. Its use is dynamic and never we imagine any development is possible to without the electricity in present world. In this context over the year all of our students who are deeply involved in electrical trade and eventually they have skilled and expertise on both the theoretical and practical work. It is crucial that presently they have able to engaged themselves on electrical warring, motor repairing, Air conditioner and refrezator repairing etc. As a result they able to create self-employment opportunity in job market both the national and international levels.

Electrical trade

Welding trade

The welding trade is a very hard and complex technology and has ample demands both the national level and international labor market. In the rapid developing of science and technology in the current world the under water welding technology is high demanded factors in international labor market. However, all of students of welding trade courses have much experienced and experts on how to be 4-G-Arc, Gas welding, Gas cutting and how to be operate terming taper foaming etc. Obviously, they have a glorious opportunity to provide themselves any where in it works either nationally or internationally.

The tailoring and dress making trade is very popular and needful income generating activities among the unemployed youth both the girls and boys. However, presently we have students in the tailoring and dress making trade most of them are girls and unemployed and coming from local poor community. It is evident that Bangladesh is well known all over the world in its export of garments products and earning major portion of foreign currency every year through exports various item of garments products. In one year long course of dress making technology most of the students were gathered much experienced and they able to making pant, shirts, school dress of children, frock, blouse, petticoat, slower and kamize fotua etc. Moreover now they can be able to income money by applying such technology as local levels or town or mega city levels.

Garments & Tailoring Trade

MVTC Program

Training Centre/Theoretical class room

The VTC have a well accommodated training center with theoretical class room facilities that were newly constructed. The training center has a sufficient space where yearly conference and theoretical class is going on around the 4 trade courses. Presently each trade has 15 students.

VTC Monthly staff meeting

A provision has to be VTC monthly staff meeting together with all instructor and management level key staffs that held on first week of every month. The main objective of the meeting is to identify cause of current problems that are barrier to learning both the practical and theoretical class. However, the meeting might have to measure output and review the overall findings and observation through close scrutiny in every month
