Annual Report – 2014

MESSAGE FROM THE EXECUTIVE DIRECTOR

This Annual Report contains the performance of the program activities for the period of January to December 2014. We are happy that with the donor support, Aloshikha during the period has been able to effectively implement the program activities for the benefit of the poor and marginalized people through the community service delivery. The Aloshikha is committed to continue its support for the underserved and marginalized people especially in the hard to reach areas. It gives me great satisfaction to see that we have been able to serve the most in need people of Bangladesh in the areas of education and reproductive health and vocational training and education and rights. Once again our staffs have shown their dedication and hard work. But we do believe that more need to be done and for this we are constantly undertaking improve projects and initiatives under various programs in response to the needs of our beneficiaries. In order to the all funding agencies and donors are requested to fund us to embark on activities for the marginalized and disadvantaged people who were deprived from services and victims of social inequality.

We had to face challenges in accomplishing the planed activities. Limitations and challenges have been mentioned in this report with an indication of ways to overcome those. The needs of our service users are at the heart of everything we do and as you learn more about our values you will understand why offering quality services is integral to what we do and what we are.

2014 was a momentous year for Aloshikha RSD Center Bangladesh. Just we celebrated 37 years of operations from our inception, and that has been a challenging journey, with active support from the people of the southwest region and generous support from development partners. We have made significant differences to the lives and landscape of this disadvantaged region.

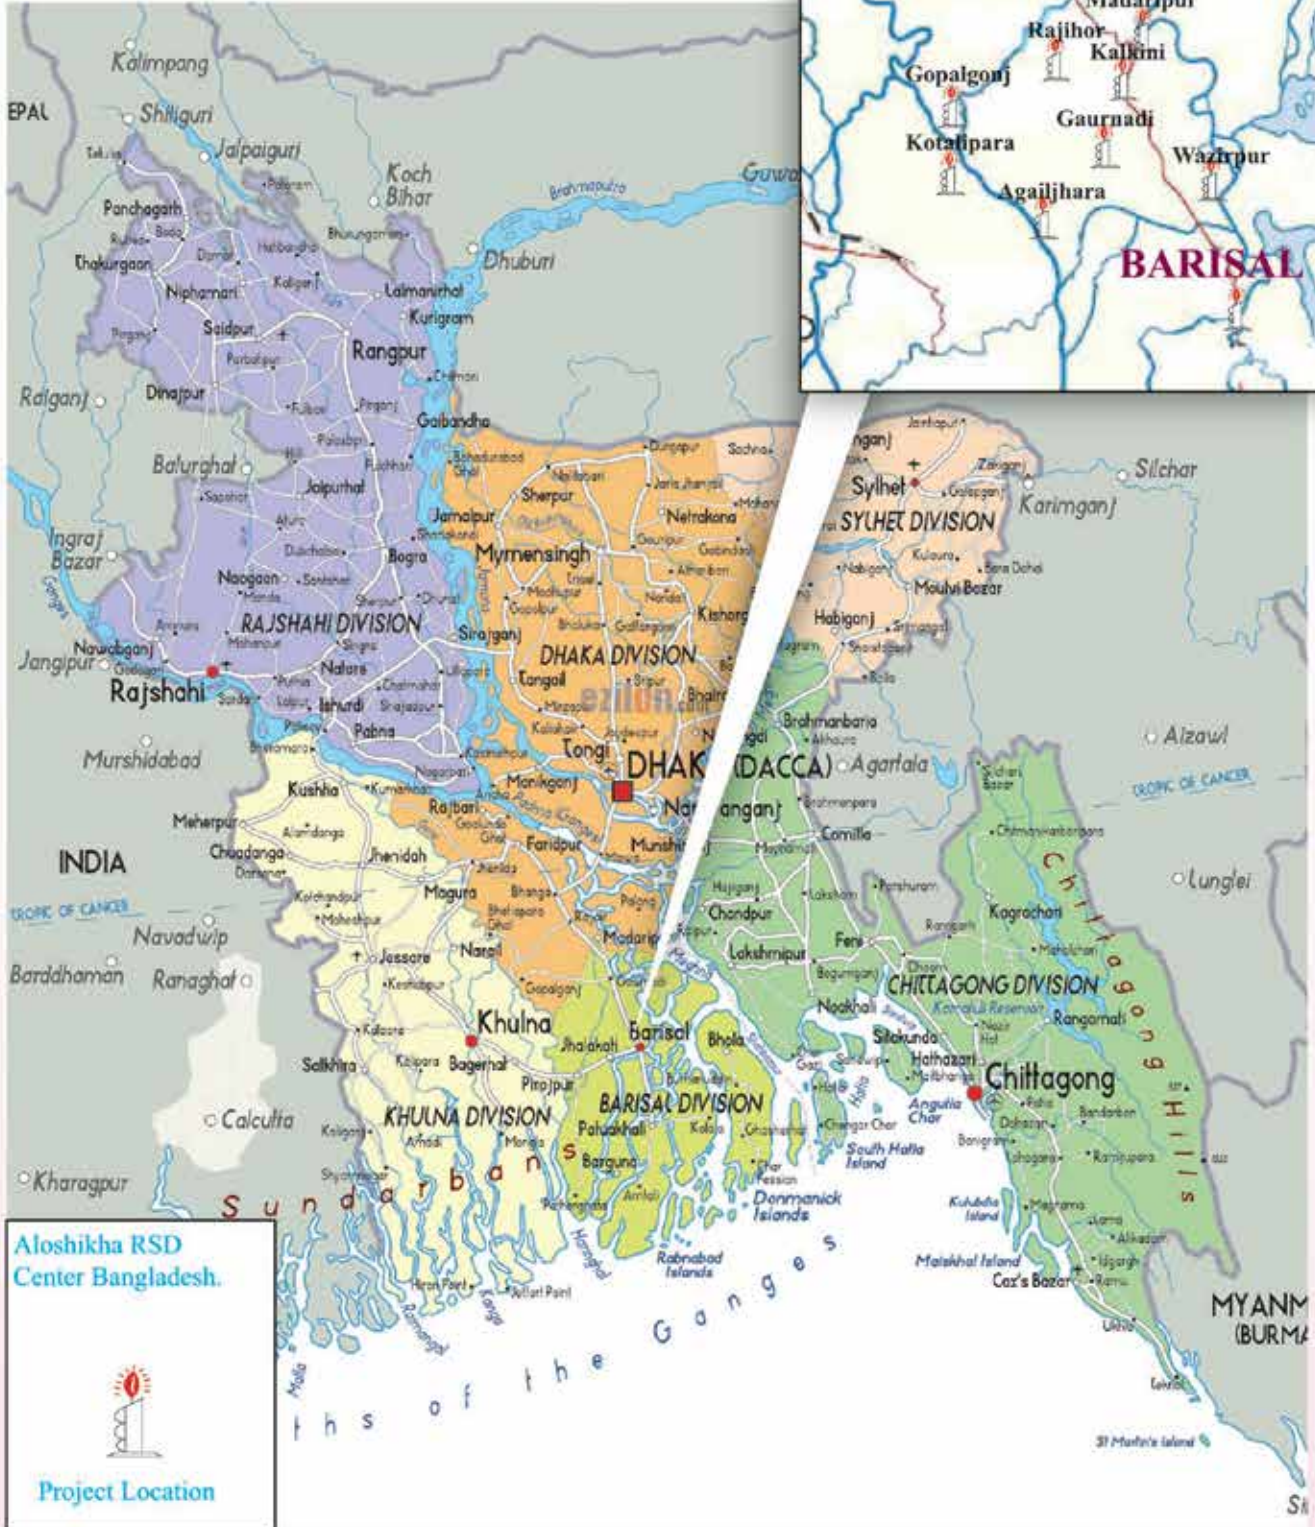

I also wish to recognize the sincere and dedicated services of our staffs of the Headquarter and the Branch Offices for successfully implementing the program activities.

Center Bangladesh.**

Project Location

Welcome to Aloshikha RSD Center Bangladesh.

Annual Report – 2014

Introduction

The Aloshikha RSD Center is now just acting as windows on applied knowledge and provides links to source of information. It is working harder exclusively in rural areas; the greater numbers are involved in water and sanitation, vocational training and education, hospital for health promotion, closely followed by environment and forestry, fisheries and micro credits, providing small loans. In recent years, the donor has initiated several development projects addressing issues of coastal zone management and targeting programs to enhance livelihoods of the coastal population and trying out to empowering vulnerable rural poor women groups with economically empowered by transferring asset and shops for alternative income generation and self-employment.

Empowering the rural poor is a prerequisite for sustainable development and exercise of their rights. It requires challenging exclusion, discrimination and exploitation of and against the landless, women, indigenous people and other dispossessed. The Aloshikha RSD Center Bangladesh is a professionally managed not for profit making charity based social development organization, registered with the social welfare ministry, NGO Affaires Bureau, micro credit regulatory and also affiliated by the ministry of health and family planning department in Bangladesh. The Aloshikha is committed to address various social and economic problems of the economically depressed and vulnerable groups in general. Empowerment of communities is a central focus issue of all Aloshikha's development initiatives. Over the years, the organization has extended its geographical, beneficiary and programmatic coverage quite significantly. The long term development program now includes education both non formal and vocational training education, micro finance, poultry and fishery and water supply and sanitation. All this work is aimed at supporting disadvantaged poor people. Over the year we have to face many difficulties and challenges with political unrest and natural disaster as well as financial constraints.

By the late 1995 an integrated comprehensive program superseded its sect oral work, focused on concentrated group organization of the poor, emphasizing social, education and economic elements. Since the Aloshikha successes have included the community based health and sanitation program to improving life on the out reach and remote villages are raising awareness of women rights and women empowerment, promoting savings, credit and skill training to improve the livelihoods of the poor section of the community. The Aloshikha program continues to evolve and innovate; current realities mean the program now comprises a range of various projects and financing large and small, which all contribute to a common objective. However, we are always encouraging to the local communities to developing all form of education in general or vocational education that could be make them smart and expertise to engaged any job or self supportive or self-employments.

This report is a testimony to the fact that with a synergetic approach towards development with support from the donor community and the local people a lot can be done to improve livelihoods.

Aloshikha Mission Statement:

Aloshikha is a Bangladeshi non-profitable humanitarian non-government organization supporting the holistic development of poor and landless people in the rural marshlands between Gopalganj, Madaripur and Barisal.

Aloshikha will support the development in the following ways:

- To create awareness on the importance of child and blow education among local people.
- To create awareness on health, sanitation, women development issues and community problems To organize targeted poor people in small groups and make them skilled through education, training's workshops and meetings etc.
- To encourage and motivate poor people to take steps to reduce their problems, improve their health conditions and their income.
- To encourage and support the poor people to start their own activities in order to create their own income, so that they will become self- sustained.
- To provide among children and their development through nutrition coverage, child health education, nutritious food, creativity materials etc.
- To provide the safe water supply for hygienic health through the DTWs and distribution sanitary latrine to the community people as sanitation coverage.
- To encourage and convinced to the community people to provide renewable energy as solar system technology for alternative electricity.
- To create employment opportunity and job replacement among the local unemployed youth both the girls and boys and to export skill work force to the international labor market a vocational training center has launched in the Aloshikha complex.
- Among local people and to encourage them to change the present situation.

Women Empowerment:

The situation of women in Bangladesh is still one of insecurity, low social status and economic dependence. But many women believe equality, equal rights, freedom from violence, free choice and full participation in all areas of society, political and work should be more than just dreams. The Aloshikha agrees and actively promotes women and women's issues in everything it does. Areas of concern for poor rural women include: their legal rights, gender equality at family and community level: domestic violence: sexual harassment and rape: reproductive health provision, trafficking of women and girls and migrant women, early marriages and dowries. Awareness raising advocacy campaigns and practical projects are carried out across the spectrum stakeholders.

Village Health Club Forum (VHCF)

The Aloshikha supports VHC Forum for our members our staff and women professionals. The goal at women club level is to ensure that women are fully involved in the running of their own organizations, influencing policy and financial decisions to benefit families and not just men. As result in the target areas have found with a large number of women in community leadership roles and on elected political bodies.

Promotion of Self Migration and Rights:

The program particularly focused on promotion of self migration and rights of Bangladeshi migrants workers: pre-departure, post- arrival and reintegration assistance for migrants to the Middle east countries. The program aims to establishing of pre-departure services and assistance in destination countries and upon return for Bangladeshi migrant workers and their families, including awareness rising on safe migration and prevention of undocumented migration/trafficking in Bangladesh society in general. The main objective of this program is to promoting supportive environment for migrant workers and their families at all stages of migration with regards to respect for the rights and dignity.

1. Special events for 2014.

Peter Hop (Martha) Doctor of the world organized Plastic Surgery Camp.

Peter Hop(Martha) one of potential representative of Doctor of the World the Netherlands visited Alohikha RSD Center and organized a Plastic Surgery Camp at Barisal Medical College Hospital for rejuvenating post burn contracture, clefts plate , clefts lefts patients. It was a camp based free medical service delivery especially for rural poor community people. Eventually, Peter Hop expresses her strong commitment to organize second Plastic Surgery Camp at Alohikha with joint venture selected as convenient date 20/02/2014.

Doctor Of The World A Camp Two Week At Alohikha & Barisal Medical College

2. JICA (hospital volunteer purpose visit)

It was in May 2014, Country Director of JICA visited Alohikha RSD Center aims to appoint one JICA volunteer for upholding health program both the field levels and its hospital based medical service delivery mechanism. In order to Mr. Isao Muto representative of Japan International Cooperation Agency (JICA) exclusively visited Alohikha and closely observe different development activities that we have initiated over the year. Isao Mutu and his team very pleased to see our intervention and have successfully passed off a table discussion shortly that was an emotional moment and committed to provide JICA Volunteer who will be active to cooperate our development process.

JICA Volunteer

3. France Embassy Representative and Atiqul Islam visited Aloshikha

French Lady Maria and one of her colleague exclusively visited Aloshikha and very pleased to oversee the overall activities of this organization. Just in the period of time Mr. Atiqul Islam and one of his friend Mr. Soumitrarya both are too much captivated towards Vocational Training Center and its education system being regularized for rural poor unemployed youth both the girls and boys and how they have an scope of opportunity to self-employment and job replacement. It was a milestone as they financially contributed 60,000 sixty thousand taka as a package study support for poor vulnerable outreach disadvantaged VTC students Date 06/12/2014

Atique Rahaman and his friends.

4. IWe Project the Netherlands Committed for Women Empowerment

It was September 2014 Mr. Steven and OMI, including a group of friends are visited Aloshikha and mostly they were represented from IWe project the Netherlands. The purpose of this project is to build up skilled and competent women workforce in the development process and how they can be economically empowered by providing their indomitable spirit and devotion through Street Food Shop, Energy Shop and Rickshaw Shop etc. In order to they closely observed construction works on different shops which will be offering rural vulnerable women stakeholders of this project in ebullient future.

Steven Kruit Visit

5. Civil Surgeon Barisal Visited Maria General Hospital

The Civil Surgeon Barisal visited Maria General Hospital, and carefully observed different health service delivery sectors particularly O.T Room and its management system and as well as other sectors. Dr. Harun-ur-Rashid Chief Medical Officer of the hospital also accompanied civil surgeon and explain hospital service delivery mechanism and management system.

Civil Surgeon's visit to Maria Mother General Hospital

6. MMPS Home Orphans program

MMPS Homes for street children program actually started early November 2014 with 10 street kids and have an excellent accommodation and education facilities. Primarily the program is running on with its limited financial capacities with contribution of individual and or local supports are the prime source of the program. It is needless to say that donor support should strongly need to be program success.

10 MMPS Orphan Children

7. PUM Expert visit to Aloshikha

Mrs Helma one of senior experts of the PUM the Netherlands visited Aloshikha RSD Center early October 2014. The PUM is one of the largest senior expert volunteer based Organization in the Netherlands. The program has focused on mainly how upholding the community health service delivery mechanism. Realizing the importance of the health promotional training and exchange of health information 3 days training have been conducted among Health Motivators and Hospital staffs, and the training facilitated by Helmi.

Mrs. Helma and our twelve Health Motivator

8. Japan Embassy Consultant Visited Aloshikha.

In the month of November 2014 MOHD Amirul Islam Consultant Embassy of Japan in Bangladesh visited two storied new hospital building that was funded by Japanese Government. Currently most of the more poor rural people of the locality are getting medical facilities with low cost and benefited from this hospital. Consultant of the Embassy of Japan in Bangladesh is strongly monitor the program still today and this process would be continued to be coming five years according to the provision of the project.

9. Deer conservation program

Md. Safiqul Islam Inspector and Research Officer Department of Wildlife Animal Conservator Bangladesh Government have exclusively visited Aloschikha September 2014, particularly Deer Conservation Program. After close scrutiny and necessary desk work issued a Firm category license. Initially they given an individual license when start up the program where to be scope of reared up only 10 deer according to the rules of license. Currently the Firm has 17 deer with heavily protection around the wire net boundary and have an excellent proper scientific management and treatment and care.

Inspector and Research Officer visit Deer Conservation Centre and approved Firming License

10. Climate Change

The Bangladesh is recognized as a country most vulnerable to climate change. Natural hazards such as floods, increasing rainfall, rising sea levels, and tropical cyclones are expected to increase which may seriously affect agriculture, water and food security, human shelter and livelihoods. Climate change adaptation and food security continues as priority areas as organization seeks innovative ways of mitigation the impact of a changing climate. Disaster and flood proofing homesteads of vulnerable river household strengthening their food and livelihood security and piloting exciting new crop varieties are among the major contributions. Improving quality of life also features strongly we run very effective health and education programs which reach out of thousand individuals.

A. Case Study of Liton Bakshi Street Food Shop Keeper

I am Liton Bakshi and my age about 35 years and still I was enjoying my domestic life very measurable condition including my wife, daughter and one son due to extreme poverty and limited scope of work for which it was impossible to manage, meet the demand for my daily life. We are living at Rajihar village and it was very close to Aloshikha RSD Center under Agailjhara sub-district and in the district of Barisal, Bangladesh. Basically I am day laborer and have lost my land and

currently living one of my bothers lands that he gave me as temporary basis until and unless I have to seek out or manage other places to live or shift my family as much as quickly. However, my only daughter Setu Bakshi had been reading class ten and my son Tapos Bakshi in class seven. My wife name is Kalpana Bakshi as household wife busy with her one cow that is giving now milk only source of income. Few days later and by the grace of almighty God we able to get married our daughter to a cultivators family that was located a far away from my village. After that my only thinking was how mange money for my sheltering or to purchase a piece of land where I shall build a small cottage to taking for free breathing, and it was my only dream. Fortunately for me, I got one chance from Aloshikha and they offered me to operate one Street Food Shop where I shall have to be making different food item and the product to be sellout among the rural customer. It was restaurant where available to be supply coffee, tea, and different cold drinks, cake, bread sweets and related food item as desirable from the group of customers. It was an well-furnished restaurant with nicely decorated for eye contact any customer and stand by the side of road. In the morning to evening or midnight the restaurant is continually very crowds with customers as some are pour coffee, some are watching TV serial or enjoying news from different channels. In a word the shop is running on very promisingly and hope I may able to savings money from my business after few years to fulfill my dream a piece of land where I would be like to build my small cottage.

Eventually I would like to thanks to Aloshikha and really grateful to let me an opportunity to work with IWe project as Street Food Shop to fulfill my dream.

We thank you.

Liton Bakshi

B. Computer Training Program

Computer training is going on for the school children

The Bangladesh is now digitalized country and most of the more young students are depended on computer due to their studies and employment. We can not think that without computer any government or non government office do not have activated their program. So computer is necessary for all to learn it . In the light of the Aloshikha has been provided skill training in computer course by providing two Computer Trainers as such Mr. Idrish khan and Mr. Samson who were trained up on computer technology from Techno Touch System Ltd. Dhaka. Presently the Aloshikha has been completed as of total 12 batches where by each batch consists of 8 students both the girls and boys including 96 participants with skill in computer training -2014. at the same time for the children

C. Integrated Rural Health Support Programme

Checked-up pregnant mother with motivational work.

Hotchpotch cooked on at Nutrition Camp for malnourished children

The Alosikhya RSDC enter always gives more emphasis towards the child health care and nutrition's deficiency. The program is funded by the SAKO Foundation the Netherlands which continue to help us to work for health motivators to address the plight and problem of child health care services at field level. In the light of their visits to take the feedback of the community based health activities through field visits with health motivators and organizing the nutrition camp in the village. This year Alosikhya was organized 12 nutrition camps at different villages among malnourished babies where 372 malnourished mothers were present during nutrition camps. We motivated to the mothers about the cause malnutrition and its consequences

Green vegetable are processing before Nutrition camp

Health motivator & supervisor gathering together with mother and children for motivation the nutritious food and display the different card

The resistance fund one of an emergency support for medical treatment and actually who is financially stagnant and economically vulnerable or dose not affordable to manage medicine. Alosikhya has received a resistance fund from the SAKO Foundation (The Netherlands) for which vulnerable local people can overcome the emergency situation easily. In the last year we able to provided medicine for treatment and cash money among the at least 419 vulnerable people in the community.

D. Pre-school program

It goes back 15 years the Aloshikha is operating 41 pre schools in the different part of the Barisal district. According to provision of the project every pre school have 30 children age about 5 to 6 and course duration of two years only. It is estimated that after two years of learning about 600 children able to admitted to the government primary school. During the learning period children were better informed about their rights and abuse and child labor and trafficking and related issues. In our 41 pre school a total of 1230 children were enrolled every day during school period. They are getting free medical check up and quality sanitation and hygiene facilities and nutritious feeding facilities.

E. Creativity Program

Over the past year teaching strategies has demonstrated our commitment to innovation by consistently upholding and expanding our offerings and engaging with educators to implement best practices. In the last year our curriculum has evolved from a theory of room management to a comprehensive collection of rich resources that offer moment-to –moment support. Every edition has always incorporated the most recent creativity program on the best way to help children thrive.

At teaching creativity education strategies we believe that the best way to help children succeed in to teach them to be creative, confident thinkers, that means offering them opportunities for hands0onexploration and discovery that help build lifelong critical thinking skills and foster confidence. The creative curriculum for preschool provides teachers with the content and tools needed to encourage and support every type of learner and address all the important area of learning.

The creative activities for preschool are a comprehensive collection of knowledge building and daily practice resources. However, very recently Mrs ANS Beek one of senior expert and volunteer from PUM the Netherlands visited Aloshikha and exclusively supported to creativity program in to the preschool for cognitive development for preschool children.

Deposit to Creativity materials

The children drawing to Creativity materials for use

F. Education program (Kindergarten School)

We felt that education is important for all and without education none can take part to the Nation building process. It is crucial that quality children education means the Kindergarten education. The Kindergarten education system is costly rather than government primary education in rural context. The Aloshikha has started initially one kindergarten school within its campus, eventually it came in to three kindergarten school in different places. The main focus of the program is to ensure quality education and include creativity activities on regular basis for their cognitive development. A parents meeting was held on school premises yearly 3 times with a view to how they achieved quality education. In Bangladesh all the Kindergarten schools are mainly academic oriented and we put little emphasis on extra curricular activities among the students. In addition the organization has able raise voice against the child abuse and child trafficking and their rights, road safety and to promoting their cultural heritage.

UNO Wife distribute the new school dress

G. VTC Program

The Aloshikha RSD Center is operating one vocational training center with in its complex. The main focus of the program to creates job replacement among the rural unemployed youth both the girls and boys. Until very recently the Center has affiliated from the Bangladesh Technical Education Board (BTEB) as SSC Vocational Course. In respect of only four trade courses are activating such as Mechanical, Welding Fabrication, Tailoring and dress making and Electrical out of welding trade other tree trade has been approved by the Bangladesh Technical Board. According to the requirement and curricula of the technical Board every trade course has the 30 students as both the girls and boys. The center has able to convinced the local un employed youth that vocational education is only the resource for income generating process and job facilities at national and international labor market.

Visit to Marteen Electrical trade

The Alosikha Vocational Training Center is duly affiliated by the Bangladesh Technical Education Board. The Board has the responsibility to support to the center as to their provision as logistic and others support. In view of book distribution has completed among students of the vocational training center recently.

H. Micro-credit program

The Micro-credit program is growing annually. Aloshikha working areas are the remote villages in Agailjhara, Wazirpur, Kalkini, Kotalipara, Rajoyer and sadar Gopalgonj. In this low land area Aloshikha is reaching the poor communities and families. However Aloshikha could not fulfill all the demands of the beneficiaries.

The training program for beneficiaries and supervising, office staff and management will be continued in 2014.

The integrated approach of Aloshikha makes it possible to give a broad support to micro-credit beneficiaries. Not only practical training on small business activities, technical training and support are given by Aloshikha, but also preventive, primary and curative healthcare are offered by Aloshikha. Many children of micro-credit group members are attending Aloshikha pre-schools.

I. Fishing program

Aloshikha Fishing Program

The fish play an important role in the Bangladeshi diet constituting the main and often irreplaceable animal protein source in poor rural households. The study addressed the dietary contribution of fish to vitamin A, calcium and iron intakes and the potential of integrating small indigenous fishes. In the light of the Aloshikha has undertaken fish cultivation program in its own water bodies both the high varieties and local indigenous species.

Rice and fish dominate the diet of Bangladeshis to such an extent that the old common proverb “machee bhatee Bengali” which can be translated as “Fish and rice make a Bengali” continues to hold true. Fish is an essential and irreplaceable food in the rural Bangladeshi diet. Together with boils rice, this is eaten at least twice per day with small amount of vegetables and fish make up the typical meal.

Bangladesh is dominated by floodplains and rivers, which are rice ecosystems for fresh water fish. The floodplains which comprise over half of the country, are inundated annually during the monsoon season, and agriculture and natural fisheries complement one another. In the monsoon to post monsoon season (June to November) the floodplains provide an ideal habitat for the wide diversity of wild fish species, whereas in the dry season, the land is cultivated with rice. However, the importance of fish as a rich source of animal protein is well established and this is frequently used to justify fish as a valuable food, whereas very little attention has been given to the role of fish in supplying vitamin A and minerals in the diet.

J. Poultry and Dairy Program

Since 18 years ago Aloshikha inspired to the community people for poultry farm business and it was much neglected business to the community people due to manifold problems such as bad smile from poultry faces, soft meat and only water inside an egg. So, Aloshikha has been achieved stupendous success through motivation and represented to the community people as model that it is a one kind of profitable business. Today there are many small poultry farms are being established surroundings areas behold with attention as model of Aloshikha poultry farm. It is really indeed, that community people have recognized as a pioneer of Aloshikha on poultry business. Presently it seems to be a profit making program since 2014 -2000 by reared up high breed layer hen that were both the purposes table and eggs.

Poultry farm

The Aloshikha has started its cow rearing program through Dairy Farm concept since 2014 and initially grassing for 9 cows, in view of to ensure pure milk production and sustainable supply to the local community as low cost. Unfortunately the program had not been profit making due to some adverse environment such lack of cow feed and inadequate grass land, low-lying flood prone area and have not seen abundantly high land where cows are grassing freely. In the following reason behind the program will be gradually going to be closedown.

Dairy farm

Poultry Agriculture:

Year	2009	2010	2011	2012	2013	2014
Total Eggs	1,50,178	2,27,841	1,63,105	1,75,150	1,35,839	85,000

K. Dental Service Program

The Aloshikha Dental Clinic has been established to bridge the gap between the ever increasing demands for dental care and education service delivery both the Urban and rural areas. The Dental Clinic is located at Rajihar village under Agailjhara Upazila in Bangladesh, the Clinic cum Maria Mother and Child Health Care Clinic that blends the best of traditional and modern techniques backed by good qualities facilities like well-equipped clinical dental department and, have general health care service delivery facilities. The Clinic is important and remarkable for its panoramic location and low cost improved service delivery to the clients.

It was an urgent need for basic dental health care and education in the remote region in Bangladesh. This program has expanded over only the three month past to encompass the entire local community. It is estimated that over 500 people have been instructed in proper oral dental care practices and behavior modification in order to over 1000 one thousand people were better informed by providing necessary communication and information. More importantly in terms of we able to convinced to the local community people who are not much informed to use toothbrush/ toothpaste for which supply has been made available, so every person can receive such materials and their financial limitations do not hinder their right to proper oral dental health care and education. A study is shown that it should to need receive training for local community people who are not much aware on the point of issues. It could be much better to make the training more significant to include in the training component on proper brushing techniques from public oral dental health professional prior to them arrival in dental clinic at Aloshikha Campus. In view of, what we have done over the period on dental care and education that given below on table content.

SI No.	Description	2012	2013	2014

L. Maria Mother General Hospital

This hospital grant was awarded from the Japanese Government in late 1997 for infrastructure development and purchase of materials but there had not been included any administrative cost in this grant. Still we are working our activities since over 15 years and all medical accessories using properly. In 1996 in order to reduce the gaps between health services and the community, and to raise awareness amongst the poor of available health program the Maria Mother & Child Health Care Clinic was established and later it comes to be a general hospital with strong referral system in the community of remote village

under Barisal district in Bangladesh. During the design process of program staff of this general hospital has able to identify the health problems in the community. It also met with the Upazila health and family planning officer to identify the best approaches to meet the needs these vulnerable populations. Utilizing this community consultation approach that included inputs from local authorities has ensured increased by inform key policy and community makers. Under this project at least 12 female Health Motivators are working in the field levels and they are always active to identified primary health problem and recorded in to referral slips. Patients them take these slips to nearby Maria general hospital are given preferential treatment. For health parishioners, the use of the slips means doctors can quickly identify the issues of concern and more importantly see cases in need of treatment. However the main focus of the program is to provide low cost medical service delivery amongst poor section of people in the intervention areas, especially who are not able to access health services due to their acute poverty and adverse surroundings. In that cases the health motivators to take the responsibilities to identify gaps between the clients and provide them counselling what they should be done during pregnancy if any complicated have seen. They also to be active to provide how they reach postnatal and antenatal care and all sorts of primary health care services amongst poor community. Finally the hospital is registered with the Ministry of Health Bangladesh Government and recognized as 20 beds general hospital.

The above circumstances were the main reasons for Aloshikha to start a small hospital with advanced medical equipments and especial attention is given to the health condition of women and children.

This hospital started its services in January 1997 and although it is expected that eventually the hospital will be self-sustaining in the long run but it is impossible to be self-sustaining right from the start. Aloshikha hopes to reach this start of self-sustainability in shortest possible times.

Dr. Harun Ar Rashid and Helma check up patient

Maria Mother & Child Health Care Clinic services through the trained health providers are as follows:

- a. In door/Out door 24 hours along emergency management
- b. Major/minor operation facilities
- c. Ante-natal, neo-natal and post-natal along incubation facilities
- d. Diagnostics facilities such as Ultrasound, Diathermia, incubator, ECG, X-ray, Blood, urine, stool, sputum etc.
- e. Resistance fund facility for the poor
- f. Patients referral (Ambulance) and out call facilities
- g. Family planning, safe motherhood, breastfeeding, HIV and hygiene counseling
- h. Audio/ Video health conciseness program for out/in door patients
- i. Especial session on collaboration with the Bangladesh government such as EPT, NID, sterilization etc.

Dr. Uttam Kumar Bakshi and the O.T team were prepared for caesarian operation.

M. Aoshikha Solar Home System Program

The Aoshikha has promoted renewable energy program as such as solar home panel system due to constant load shedding from the government electric supply sectors. In terms of some off grid areas we also provided solar home system where electric supply chain is inadequate and difficult to connect electricity from the government or non government electric supply authorities, partly because of their insufficient materials and man power and limited power generation. After a study of feasibility the organization intend to establish some solar irrigation pump to ensure food security in the rural field level with joint discussion on farmers group. It is estimated that under the solar irrigation program cultivatable all land should be come in to three cropping system in a year. In order to how number of solar home panels we provided to the rural community that are given below on table contents:

List of Solar distribution - 2014

SL No.	Name of Branch	Total House Hole	Word
01	Rajihar	44	25 - 100
02	Vhurgata	21	
03	Kadambari	15	
04	Kaligonj	16	
05	Pirarbari	35	
06	Sikerpur	28	
07	Panbari	22	
Total		181 Family
