### MESSAGE

#### From The Executive Director

The Annual Report contains the performance of the program activities from the period of January to December 2023. We are expressing our gratitude to our donors for their generous support which make Aloshikha able to effectively implement the program activities for the benefit of the poor and marginalized people through its service delivery for the community. Aloshikha is committed to continue its support for the underserved and marginalized people especially in the hard to reach areas.

It gives us great satisfaction to see that we have been able to serve the neediest people of Bangladesh in the field of education, reproductive health, vocational training and rights.

Dedication and hard work of our staffs have made it possible to achieve goals and objectives of our projects and programs. But we do believe that more efforts are needed to upgrade the living standard of our target groups undertaking different need based social welfare program and projects.

We would like to thank donors and private sectors whose efforts and financial support have made these results possible. We request all donors and private sector to support, financially, for our future programs in order to embark on activities for the marginalized and disadvantaged people who are deprived from services and are victims of social inequality.

2023 was a momentous year for Aloshikha RSD Center, Bangladesh. We celebrated 39 years of our operations since its inception, which was a rewarding and sometimes challenging journey. We have made significant differences to the lives and landscape of this disadvantaged region.

I also wish to recognize the sincere and dedicated services of our staffs of the Headquarter and the Branch Offices and also hon'ble members of the Executive Committee whose support helped implementing the program activities, successfully.

**James Mridul Halder**  
Executive director.

# Geographic Context

## Bangladesh Divisions of Bangladesh

Where Aloskhia works in Bangladesh

## Where Aloshikha works in Bangladesh

### *Welcome to Aloshikha RSD Center Bangladesh.* **Annual Report – 2023**

#### **Introduction**

The Aloshikha RSD Center is a window of opportunity for vulnerable people access to knowledge, skills, and information they need to improve their lives and livelihood. Aloshikha RSD Centre Bangladesh is a professionally managed not-for-profit social development organization, registered with the Ministry of Social Welfare, NGO Affairs Bureau, and micro-credit regulatory authority and also affiliated by the Ministry of Health and Family Planning of Bangladesh.

The working area of Aloshikha RSD Center is located in coastal southern region of Bangladesh, where the river the Padma (called Ganges in India) and Jamuna (called Brahmaputra in India) merge into the Meghna river. Floods are an annual phenomenon, which impacts life and livelihood of poor people of the location. Aloshikha has already grown into a well-known local organization that tries to support the poorest of the poor of society both in the form of social and economic aspect. Gopalganj, Barishal and Madaripur district are its working area. In order to reach support to outreach locations Aloshikha has established branch offices in four locations. In addition Aloshikha has established small community centers (PRIMA) where there is a class room for a pre-school and small office space for health education activities.

Aloshikha is committed to addressing various social and economic problems of the economically downtrodden and vulnerable groups in general. Empowerment of communities is a central focus of all Aloshikha development initiatives. Over the years, the organization has extended its geographical coverage, beneficiary and programmatic coverage quite significantly. The long term development program now includes non-formal and vocational education, poultry, fishery health, and water supply and sanitation. All these works are aimed at providing support to disadvantaged poor people. Over the years we have to face many difficulties and challenges such as political unrest, natural disaster, and financial constraints as well.

ALOSHIKHA works in exclusively in rural areas, primarily to support local people help access to water and sanitation, pre-primary education, vocational training/education, hospital and health promotion. Other programs include environment and forestry, fisheries, agriculture and providing capital support to its beneficiaries for their income generation.

Aloshikha believes in potentialities of its target people that's why focuses were given to an intergraded comprehensive program uniting the poor into groups and emphasizes social, education and economic elements in late 2000.

Since then, Aloshikha successes have included community based health and sanitation programs in remote villages, raising awareness of women rights and women empowerment, and promoting savings, and skill development training to improve the livelihoods of the poor section of the community. Aloshikha's program continues to evolve and innovate current realities mean the program now comprises a range of various projects and financing, large and small, which all contribute to achieve a common objective. We are encouraging local communities to receiving all forms of education, vocational or otherwise, to strengthen their self-employment opportunities or make them more employable.

Empowering the rural poor, however, is a prerequisite for sustainable development and enjoying of their rights. It requires overcoming challenges of exclusion, discrimination and exploitation of the landless, women, indigenous people and other dispossessed people. Aloshikha is committed to its works and trying its best to support the poorest of the poor and vulnerable population.

In recent years, several development projects have been initiated to address issues of coastal zone management, enhancing livelihoods of the coastal population and empowering, economically, vulnerable rural poor women groups by transferring wealth and assets for alternative income generation and self-employment. This report is a testimony to the fact that with a synergetic approach towards development, support from the donor, community, and the local people, can do a lot to improve livelihoods of poor. Thanks to all the donors who supported generously to help implement the programs/projects.

### **Mission statement of Aloshikha:**

Aloshikha is a Bangladeshi non-profitable humanitarian non-government organization supporting the holistic development of poor and landless people in the rural marshlands between Gopalganj, Madaripur and Barisal.

### **Aloshikha supports the following development areas:**

- **Education** (elementary, and vocational)
- **Health and nutrition** (clinical & PHP), capacity building traditional birth attendance, family planning.
- **Water, Sanitation and Hygiene** (WASH), deep tube wells (DTW), safe drinking water, and sanitary latrine distribution
- **Social protection** (women empowerment, adolescent girls, SGBV activities and referral system Development)
- **Income generation activities** (IGA) (poultry, fishing, dairy and milk production etc)
- **Solar Panel System** as green energy sources
- **Tribal empowerment through** education and IGA

### **Aloshikha support specifics local development with the following activities:**

- **Awareness raising** on the importance of education, health, safe water & sanitation, women development issues and community problems.
- **Organizing targeted poor people in small groups** and make them skilled through education, trainings, workshops and meetings etc.
- **Encouraging and motivating poor people** to take steps to reduce their problems; improve their health conditions and their income so that they will become self-reliant.
- **Strengthening child development** through child health education, nutritious food distribution, creativity materials etc.
- **Providing safe water supply** for hygienic health through the DTWs and sanitary latrine distribution, Encouraging communities to use solar power as an alternative and renewable energy source
- **Providing skills training** and creating employment opportunities among locally unemployed youth, especially through the Vocational Training Center, for job creation locally and for international labor markets
- **Providing the food, nutrition, and education of orphaned boys and girls**
- **Supporting the needs of disabled people**

### **Highlighted Focus Areas:**

#### ***Women Empowerment***

The situation of women in Bangladesh is still deplorable, low social status and economic dependency. Equal rights, freedom of speech, no violence, free choice and full participation in all societal activities should be desirable. Aloshikha actively promotes women and women's issues in all programs and projects. Areas of concern for poor rural women include, legal rights, gender equality, domestic violence, sexual harassment, eve teasing, rape, reproductive health provision, trafficking to women and girls', early marriages and dowry etc.. Awareness raising, advocacy campaigns and practical project activities are carried out with involvement of a variety of stakeholders to eliminate those inequality.

#### ***Promotion of Safe Migration and Rights:***

The program particularly focuses on promotion of safe migration and rights to Bangladeshi migrants workers; pre-departure, post-arrival and integration assistance for migrants in the Middle East countries. These supports include establishing of pre-departure services and assistance in destination countries and reintegration upon return of Bangladeshi migrant workers and their families. Awareness rising on safe migration and prevention of undocumented migration from Bangladesh, in general are the activities. The main objective of this program is to promoting congenial environment for migrant workers and their families at all stages of migration with regards to respect for their rights and dignity.

## Special events in 2023

Dr Kris Johnson Family and Mr. Daniel from Food and Agriculture (FAO), Bangladesh office along with his family visited ALOSHIKHA office on January 1, 2023. He was introduced about all the activities specially agricultural activities of ALOSHIKHA| during his visit.

Delegates for Philippines (husband and wife) visited ALOSHIKHA on February 2, 2023. They were introduced about all the activities of ALOSHIKHA.

Mr. Llias agridiotis, Executive Director (Technical) an engineer from Germany, visited ALOSHIKHA office on July 7, 2023. He was introduced about all the activities of ALOSHIKHA during his visit. He expressed his satisfaction over the performance of health program and aspired to support the program in future.

A consortium of 4 partner organizations from greater Barishal and greater Faridpur, was formed where ALOSHIKHA is the lead organization. The consortium is formed to work in the field of health and education in Barishal and Faridpur region.

Educational Board Chairman along with school inspector Mr. Rafiqul Islam of Barishal Board visited ALOSHIKHA School. After visiting the school he primarily gave consent to run schooling from class six to eight as Junior high School.

In responses to request of the Executive Director of Joy Foundation, I met to her at Bashundhara, Dhaka on November 11, 2023. She expressed her intention to work with ALOSHIKHA in coming days. After some days she sent a team of joy Foundation to visit activities of ALOSHIKHA. The team expressed its satisfaction over the activities and shared the visit findings to her

Mr. Maarten Verbruggen, Managing Director of Deltadesh(pvt) Ltd. and James Mridul Halder signed a Deed of Agreement (DoA) for running vocational and pre-school program for three years (from 2023-2025).

Mr. Rafiqul Islam, inspector of Barishal Board visited ALOSHIKHA School on April 4, 2023. Seeing better performance of the school he recommended upgrading the school as junior high school ( from class six to class eight).

3 personnel from Joy Foundation, Dhaka visited ALOSHIKHA on November 11, 2023 to have a look at all the activities of ALOSHIKHA and after visiting they expressed their satisfaction of the program/project implemented by ALOSHIKHA.

## Deer Conservation Program

Mr. Tanmoy Archarjo, Inspector and Research Officer of Department of Wildlife Animal Conservation, Bangladesh visited Aloshekha on October 21, 2023, particularly to oversee the Deer Conservation Program. After close scrutiny and necessary desk works, he issued a Firm Category license to Aloshekha. Initially an individual license was given, during startup of the program when scope of rearing up was only 10 deer according to the rules of license. Currently the Firm has 12 deer having heavy protection of wire-net boundary and has an excellent proper scientific management, treatment and care in place. However, being deer rearing is a complex matter in terms of govt. compliances and wild life conservation rules and regulations we have decision to close the farm from 2023.

## Integrated Rural Health Support Programme

Integrated rural health support program is the core program of ALOSHIKHA and the program is being implemented since 1997-98. The components of the program are growth monitoring of children (2 – 3 years of age), demonstration of nutritional food preparation (hostpotch/Khichuri) & feeding the target children in spot, motivating mothers to cook nutritional food at home, follow up of growing children and overseeing whether mothers are giving prescribed nutritional food to children at home or not. The food preparation and feeding children are conducted organizing health camp. Usually 30 mothers along with her babies attend the camp. It's an impact fully program of ALOSHIKHA for the children. The program is supported by the SAKO Foundation, The Netherlands.

## Pre-school program

For the last 30 years, Aloshikha has been running 41 pre-schools in different parts of the Barishal, Gopalganj and Madaripur district. According to provision of the project, every pre-school has 30 children each. After graduation from our pre-schools 600 children are facilitated to get admission into government primary schools in class one. The children are imparted elementary education with different extra-curricular activities. The children are taught in a joyful environment.

Besides monthly parents meetings are also conducted in each school where mothers attend the meeting. The parents meeting discuss about the performance of the children and other child rights and different vices of the society such as

Child abuse, early marriage, dowry, child labor, trafficking and related issues. We enroll in total 1230 children in our 41 pre-schools. However, the children also get free medical checkup and quality sanitation & hygiene and nutritious feeding facilities.

### Aloshikha pre-schools & Kindergarten information at a glance (2019-2020-2021-2022-2023):

Year	2019	2020	2021	2022	2023
Pre-schools	41	41	41	41	41
Pre-school students	1230	1230	1230	1230	1230
Pre-school teachers	41	41	41	41	41
Kindergarten schools	3	3	1	1	1
Kindergarten students	327	235	235	85	65
Kindergarten teachers	21	21	6	6	5

## Mary Orphan Home (Middle Rajihar)

Mary Orphanage Home started its journey in 2014 with only 10 helpless orphan children and later it has included another 30 children and it means now 40 children are living in this Home. Some of the children do not have their mother or either father or some cases they have lost their parents. Aloshikha RSD Center has taken this specialized initiative to ensure their rehabilitation including education, health and create employment opportunity in the future. Currently all the children are studying in the Maria Child Care and VTC School that are operated and guided by the Aloshikha RSD Center. The chief initiator of the Orphanage Home, Mrs. Martha Halder thinks that it would be praiseworthy to establish them in the main stream of our society through these services. Presently 22 children have come from Chittagong hill tract zone and 08 children come from Barisal and Kotalipara, Gopalganj. Many of children are coming every day from different parts of the country to this orphanage home but it is not possible to accommodate them due to financial constraint and lack of other supports. Merely as a private sector initiative it would not be possible to meeting up the huge expense of their fundamental rights that we have to undertaking from 2014-2023. In this context we are cordially seeking helping hands from kind hearted people from regional, national or international levels who intends to support the initiative.

**Groups picture for the orphan children**

### Education program (Kindergarten school):

We felt that education is important for all and without education none can take part in the nation building process. The Kindergarten education system is costly compared to government primary education. The Aloshikha initially started one kindergarten school on its campus which eventually established three kindergarten schools in different places. The main focus of the program is to ensure quality education and explore creativity for their cognitive development. Parents meeting are held on school premises yearly 3 times with a view to assess how they achieved quality education. In Bangladesh most Kindergarten schools are mainly academic oriented, but at Aloshikha we put emphasis on extracurricular activities among the students like painting, drawing, cultural programs on occasion of Independence Day, victory day, and Bangla new year observation etc. In addition, we raise a voice against child abuse and child trafficking and their rights, road safety and to promoting their cultural heritage.

**Morning assembly at the beginning of schooling**

## VTC Program

The Aloshekha RSD Center is operating one vocational training center within its complex. The main focus of the program is to create job placement among the rural unemployed youth, for both girls and boys. At present five trade courses are in operating; Mechanical, Electrical, Tailoring & Dress Making, welding and fabrication, and IT trade. According to the requirement and curriculum of the technical Board, every trade course has 30 students each, for both the girls and boys. The center has been able to convince the local unemployed youth that vocational education is a resource for income generating process and job facilities for national and international labor markets.

The Aloshekha Vocational Training Center is duly affiliated by the Bangladesh Technical Education Board. The Center was recently affiliated as SSC Vocational Course. The Board has the responsibility to support the center with logistic and other amenities. In the year of 2023, 85 students appeared at SSC examination (Vocational). Out of the 85 students 79 students passed out.

Ministry of Education of Bangladesh has approved a 5 storied building for our vocational training centre. In the mean time construction of ground floor has been completed and all furniture and fixture have been procured for conducting classes. In future we are going to conduct pre-vocational courses in this academic building.

## Fishing program

Fish culture play an important role in the Bangladeshi diet constituting the main and often irreplaceable animal protein source in poor rural households. In this point of view Aloshikha has undertaken a fish cultivation program in its own water bodies with both the high yielding varieties and local indigenous species of fish.

Rice and fish dominate the diet of Bangladeshis to such an extent that the old common proverb “Machee Bhatee Bengali” which can be translated as “Fish and rice make a Bengali perfect” continues to hold true. Fish is an essential and irreplaceable food in the rural Bangladeshi diet. Together with rice, this is eaten at least twice per day with small amount of vegetables and fish make up the typical meal.

Bangladesh is dominated by floodplains and rivers, which are rich ecosystems for fresh water fish. The floodplains which comprise over half of the country, are inundated annually during the monsoon, and agriculture and natural fisheries complement one another. In the monsoon to post monsoon season (June to November) the floodplains provide an ideal habitat for the wide diversity of wild fish species, whereas in the dry season, the land is cultivated with rice. However, the importance of fish as a rich source of animal protein is well established and this is frequently used to justify fish as a valuable food, whereas very little attention has been given to the role of fish in supplying vitamin A and minerals in the diet. Aloshikha has four big ponds, where it cultivates fish both for the purpose of internal dietary supply and generating revenue for the organization.

## Poultry and Dairy Program:

### Poultry

Since 23 years Aloshikha has been inspiring community people to adopt poultry farm businesses. It was a much neglected business to the community people due to problems such as bad smell from poultry feces, soft meat and morbidity of the birds. However, Aloshikha’s programs have achieved great success in developing and training communities in profitable poultry business models. Today many small poultry farms are being established in surrounding areas using the model of Aloshikha poultry farm. People now recognize Aloshikha as a pioneer of the poultry business. Presently it seems to be a profit making program, rearing high yielding layer breed that are used for both meat and eggs purpose.

### Dairy Farm

Aloshikha started its cow rearing program through Dairy Farm concept in 2000 and currently it has 10 cows in the farm. The dairy farm ensures milk and sustainable supply to the local community at lower cost. Unfortunately the program had not been profit making due to some adverse environment such lack of food and inadequate grazing land, low-lying flood prone area and have not abundantly high land where cows can grassing freely. For this reason the program will be gradually closed down.

### Poultry increasing rate:

Year	2019	2020	2021	2022	2023
Total eggs	102284	262090	22300	17200	-
Total Layers	1402	870	650	500	3000

### Dairy and milk production:

Year	2019	2020	2021	2022	2023
Milk kg.	991	1800	2200	3500	3960
Cows	4	4	10	10	11

## Goat Rearing Program:

This program started with three goats in 2019 by Martha Halder, the monitor of Aloshika. At present, the number of goats raised to 30, local black bengal variety. Hopefully, this project would bring a great profit. The program is really beneficial to the beneficiaries. Demands drive Aloshikha to expand it as soon as possible. The program will be integrated to Aloshikha's IGA program. No fund is available right now for the program but the fund raising efforts are in progress.

Year	2019	2020	2021	2022	2023
Goat	3	17	25	32	62

## Maria Mother General Hospital

This hospital grant was awarded from the Japanese Government in late 1997 for infrastructure development and purchase of materials but did not have financial support for administrative costs. Still we are operating our activities for over 26 years and using all medical accessories properly.

In 1996 in order to reduce the gaps between health services and the community, and to raise awareness amongst the poor of available health program the Maria Mother & Child Health Care Clinic was established and later it became a general hospital with strong referral system in the community of remote village under Barisal district in Bangladesh.

The program staff of this general hospital has been able to identify and treat the health ailments in surrounding communities. It also met with the Upazila health and family planning offices to identify the best approaches to meet the needs of vulnerable populations.

Under this project at least 08 female Health Motivators are working in the field levels and they are always active to identify primary health problems and record them in referral slips. Patients then take these slips to nearby Maria general hospital and are given preferential treatment. For health practitioners, the use of the slips means doctors can quickly identify the issues of concern and more importantly see cases in need of treatment. However the main focus of the program is to provide low cost medical service delivery amongst poor section of people, especially who are not able to access health services due to their acute poverty and adverse surroundings in the intervention areas. In that case the health motivators take the responsibility to identify gaps between the clients and provide them counseling about

Ailments that are what they should do during pregnancy if any complications arise. They also advise how they access postnatal and antenatal care and all sorts of primary health care services amongst poor community.

The above circumstances were the main reasons for Aloshikha to start a small hospital with medical equipments and especial attention is given to the health condition of women and children. Finally the hospital is registered with the Ministry of Health Bangladesh Government and recognized as 10 beds general hospital. This hospital started its services in January 1997 but is still in the process of becoming financially self-sustaining. Aloshikha hopes to reach self-sustainability in the shortest time possible.

### Maria Mother & Child Health Care Clinic services through the trained health providers are as follows:

- a. Indoor/Outdoor 24 hours medical emergency service
- b. Major/minor operation facilities
- c. Ante-natal, neo-natal and post-natal along incubation facilities
- d. Diagnostics facilities such as Ultrasound, Diathermia, incubator, ECG, X-ray, Blood, urine, stool, sputum etc.
- e. Resistance fund facility for the poor
- f. Patients referral (Ambulance) and out call facilities
- g. Family planning, safe motherhood, breastfeeding, HIV and hygiene counseling
- h. Audio/ Video health conciseness program for out/indoor patients
- i. Collaboration with the Bangladesh government such as EPT, NID, sterilization etc.

## Maria Mother General Hospital patients' statistic:

Year	2019	2020	2021	2022	2023
Female	650	530	270	175	106
Male	550	390	220	98	95
Child	100	76	40	66	66
Total =	<b>1300</b>	<b>946</b>	<b>530</b>	<b>339</b>	<b>267</b>
Deliveries	240	170	90	14	4
Appendices	35	10	3	06	6
Caesarian	15	140	80	12	18
Minor OT	10	5	3	30	6
Ultrasound through the pregnant mother	350	290	150	125	155

## NGO Platform Cox's Bazer, Bangladesh

Aloshikha attended 13 workshops organized by BRAC in Cox-bazar through “Pool Fund” . The trainings were conducted to building capacity of NGOs. In this respect different policies of ALOSHIKHA were reviewed and upgraded, taking guidance of the policies supplied at workshop by BRAC. ALOSHIKHA has an office in place in Cox-bazar.

Mr. James Mridul along with two colleagues attended a workshop at Sara Resort, in Gazipur organized by Concern Worldwide, USA. The aim of the workshop was to building capacity of NGOs in the field of development works.

Aloschikha organized Annual General Meeting (AGM) of 2023 on 1st January, 2024. In the AGM, Dr. Kristofer Johnson attended the program on line. Two hon'ble advisors of Aloschikha Advisory pool; Mr. Joost Verwilghen, Ms. Martha Houpt also attended the annual general meeting over online and presented their important advices for Aloschikha. Like other AGM, the board members greeted them and wished to get guidance from the Honourable advisors for making the organization a renowned one. They expressed satisfaction over the activities of the organization and thank all the members of the General Body for their valuable contribution to make the organization's activity worthy one. All the staff members of Aloschikha also present in the annual general meeting with the attended to journalists meeting was followed by a cultural function.
